Our PET team in Eberstalzell

Our values:

humanity - trust - teamwork
fair - social - flexible

PET Austria GmbH

Our name PET stands for the German words
Putz (plaster), Estrich (screed), Trockenbau (drywall).
Of course, Austria stands for our home country.

Since our start in 2000 we have built up a lot of experience and competence.

**As a family company, we attach special importance
to humanity and long-term partnerships.**

Personal contact with our customers is also very important for us.

We now deliver our products to customers
in more than 40 different countries on 3 continents.

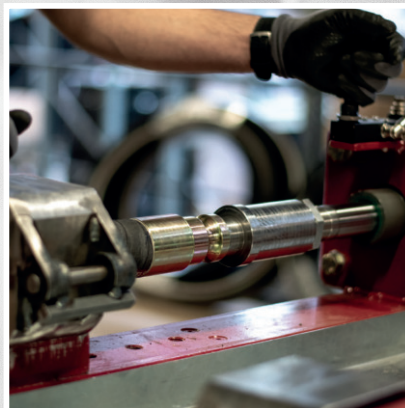

With our German subsidiary PET Deutschland we are even closer to our German customers.

Why we are manufacturer

An excellent quality of our products is very important to us.

As a manufacturer, we not only keep our quality standards,
but also continuously improve it.
We are happy to develop new innovations for our customers,
perfectly adapted to the needs of construction.

**With the flexibility of a manufacturer,
we will also find individual solutions for your needs.**

Spritzjet TWIST FIX

with ALU MT25 360° coupling, spraying nozzle TWIST 12 mm and air nozzle pipe.

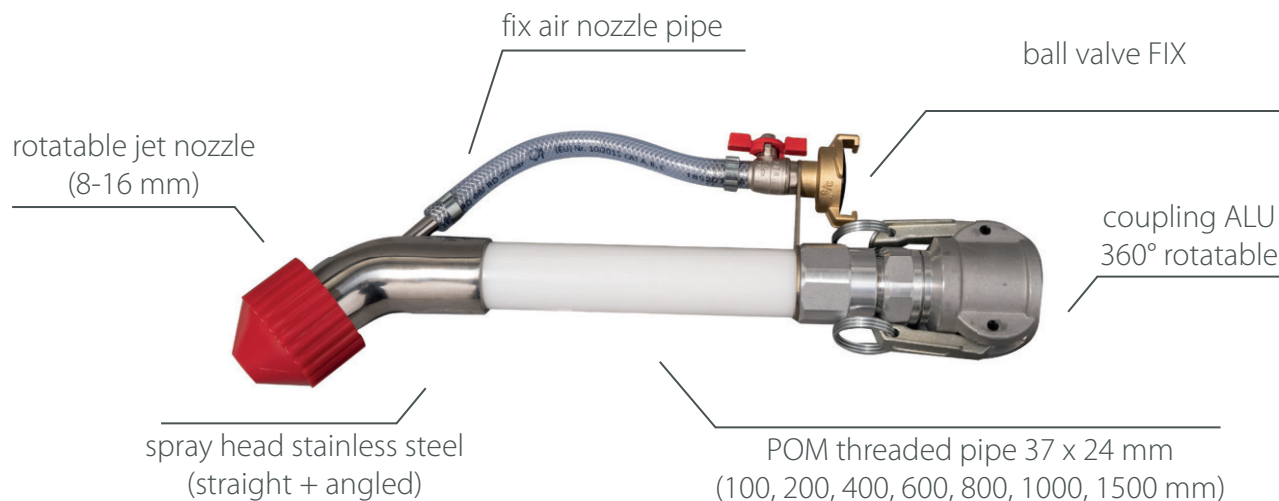

The fixed ball valve reacts promptly and accurately.

For all plastering machines up to a graining of 4mm.

The spray head made of steel fits perfectly in your hand, no matter in which position.

Stepless transition to the threaded pipe (POM).

Due to the rotatable aluminium coupling, the hose remains quietly on the floor.

Zargo

The built-in ball valve prevents the material from swelling of the mortar gun after switching off the machine.

Guarantees clean working without material loss.

The ZARGO consists of a mortar coupling, a brass coupling with hose part and a handle with electric ON/OFF-switch as well as a remote control cable (75cm).

Valve plate piston

Item 4100-512

Valve plate cylinder-head

no stroke limiter necessary

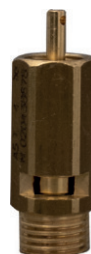

Item 4100-513

Safety valve 1/4"

3,5 bar, with sealing

Item 4100-514

EWO coupling

Item version

4100-515 female part 1/4" AG

4100-516 male part 1/2" nozzle

Injection hood and spare parts

Vibrating motor for silo

400 V, 50 Hz, 0,20 kW,
with 5 m rubber cable without plug,
3.000 rpm, 2-pole, imbalance force 3,11 kN,
weight 10,4 kg

Item 4100-980

Injection hood

with mono-cover, fill level sensor
and 50 m control cable,
for G4, VR6, M5

Item 5400-401

External sealing

for injection hood,
sponge rubber 20x15x2400
mm

Item 4100-421

Filter bag

Plug remote control

3+1-pole, 10A, with housing, cablescrew fitting with bending spiral

Item 4100-970

Coupling remote control

3+1-pole, 10A, with housing, cablescrew fitting with bending spiral

Item 4100-971

Plug housing ALU

3+1-pole, straight with 2 bolts

Item 4100-972

Plug insert

3+1-pole, 10A, 230V

Item 4100-973

Coupling housing ALU

3+1-pole, straight with clip

Item 4100-974

Coupling insert

3+1-pole, 10A, 230V

Item 4100-975

Skintop screw fitting

M 20x1,5, with bending spiral

Item 4100-979

Spare parts for conveyor systems

Carrying frame universal

suitable for all conveyor systems,
with fold-down handles

Item 4100-940

Rubber sealing pressure vessel

330x260x4 mm

Item 4100-900

Manometer 0-4 bar

1/4" connection below,
diameter 63 mm

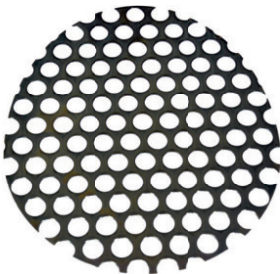

Item 4100-920

Large perforated plate

Emulsifier

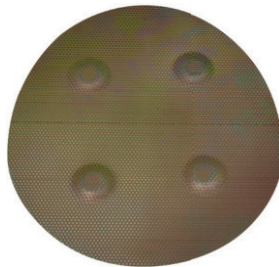

Item 4100-915

Small perforated plate

Emulsifier

Item 4100-916

Framing sealing

Emulsifier

Item 4100-917

Cuff 250 mm

for shut-off damper,
Polyurethan, green

Item 4100-910

Air filter cartridge

DP 2.100/DP 2.140 C1826

Item 4100-930

Eye screw and nut

galvanised, M16

Item type

4100-901 eye screw

4100-902 nut

Mixing tools type 4200

Mixing blade holder P1 back
back, outside

Item 4200-001

Mixing blade holder P2 front
front, gear side

Item 4200-002

Mixing blade P3 back
back, outside,
steel casting

Item 4200-003

Mixing blade P4 middle

Item 4200-005

Mixing tools type 4200

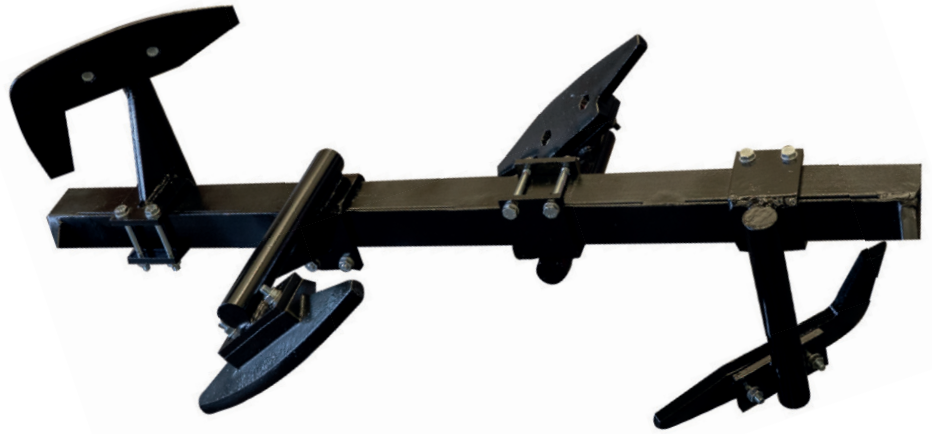

Mixing tool 4200 complete, middle outlet

for BMS, EMS, GB, Putzmeister, Brinkmann, Utiform etc.

included:

- 2x Holder P1
- 2x Holder P2
- 1x Mixing blade P3
- 2x Mixing blade P4
- 1x Mixing blade P5
- screw kit

Item 4200-008

Mixing tool 4200 complete, front outlet

for BMS, EMS, GB, Putzmeister, Brinkmann, Utiform etc

included:

- 3x Holder P1
- 1x Holder P2
- 1x Mixing blade P3
- 2x Mixing blade P4
- 1x Mixing blade P5
- screw kit

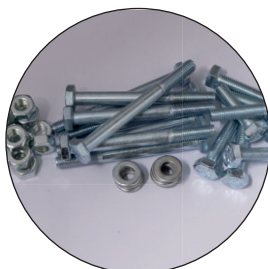

Item 4200-009

Screw kit complete

48 parts,
suitable for mixing tool 4200

Item 4800-001

Mixing tools type 4230

Mixing blade X1 front

front, gear side,
steel casting

Item 4230-001

Mixing blade X3 back

back, outside,
steel casting

Item 4230-003

Mixing bracket X4 (Mixing blade holder)

Item 4230-004

Mixing bracket X5

Item 4230-005

Covering plate for mixing bracket X4

Item 4230-006

Mixing tools type 4230

Mixing tool 4230 complete, outlet middle

for BMS, EMS, GB, Putzmeister, Brinkmann, Utiform etc.

included:

- 4x Mixing bracket X4
- 4x Mixing bracket X5
- 2x Mixing blade X1
- 2x Mixing blade X3
- 4x Covering plate
- Screw kit

Item 4230-008

Mixing tool 4230 complete, outlet front

incl. screws,
for BMS, EMS, GB, Putzmeister, Brinkmann, Utiform etc.

included:

- 4x Mixing bracket X4
- 4x Mixing bracket X5
- 1x Mixing blade X1
- 3x Mixing blade X3
- 4x Covering plate
- Screw kit

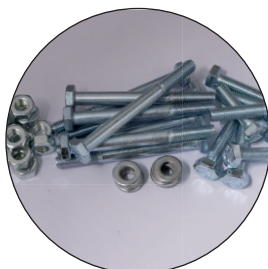

Item 4230-009

Screw kit complete

36 parts,
suitable for mixing tool 4230

Item 4800-002

Mixing tools type 4210

Mixing blade holder Ü1

right outside,
for Ülzener

Item 4210-001

Mixing blade holder Ü2

left gear side,
for Ülzener

Item 4210-002

Mixing blade Ü3

Wear plate

without outlet, 48x33 cm, with 2 drillings, thickness 8 mm, steel, for Ülzener

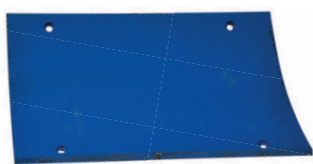

Item 4210-010

Wear plate

without outlet, 48x33 cm, with 4 drillings, thickness 8 mm, steel, for Ülzener

Item 4210-011

Wear plate

with outlet, 48x33 cm, with 4 drillings, thickness 8 mm, steel, for Ülzener

Item 4210-012

Mixing vessel outlets

Vessel outlet PM

long version,
for Putzmeister

Item 4200-020

Vessel outlet PM complete

with KK70+MT35 couplings,
incl. sealing and screws,
for Putzmeister

Item 4200-021

Vessel outlet PM

short version,
for Putzmeister

Item 4200-022

Vessel outlet PM complete

short version,
with KK70+MT35 couplings,
incl. sealing and screws,
for Putzmeister

Item 4200-023

Vessel outlet EB

Inside micrometer 160 mm flange,
centred outlet,
for Brinkmann DC 260/43-45

Item 4230-020

Vessel outlet EB complete

with KK70+MT35 couplings,
incl. sealing and screws,
for Brinkmann DC 260/43-45

Item 4230-021

Mixing vessel outlets

Vessel outlet EB

inside micrometer 170 mm flange,
decentred outlet,
for Brinkmann DC 450/550

Item 4230-022

Vessel outlet EB complete

with KK70+MT35 couplings,
incl. sealing and screws,
for Brinkmann DC 450/550

Item 4230-023

Vessel outlet

inside micrometer
160 mm flange,
for BMS

Item 4240-020

Vessel outlet complete

with KK70+MT35 couplings,
for BMS

Item 4240-021

Vessel outlet

2 1/2" AG,
1 1/4" AG,
for Ülzener

Item 4210-020

Vessel outlet complete

with KK70+VT35 couplings,
incl. sealing and screws,
for Ülzener

KA 66 mm, dimension 2",
type C-50

Item 3472-050

Storz blind coupling aluminium cast with chain

NBR sealing, KA 66 mm,
type C-66

Item 3478-066

Storz spare sealing NBR black

for suction and pressurized operation,
KA 66 mm, type 52C-66

Item 3694-066

Storz coupling key B-C

steel with PVC coating

Item 3695-100

C-coupling „FREE FLOW“ mounting outside

full passage, coupling system wear-free and
no danger of blockage, cleat ALU forged,
steel nozzle,
dimension 42/54 mm, type C-52, KA 66 mm

Item 3500-042

Sheet metal screw for C-coupling „FREE FLOW“

4,8x13 mm with TORX head

Item 3260-002

According to the requirements of the screed layers, we developed a brandnew Screeding Level with wear-resistant sole, a perfect bubble and low weight!
Now we produce this brandnew Screeding Level in-house.

Special features of the new x-tools Screeding Level:

bubble:

- extra big bubble
- 2 steel rings
- green colored edges with a sharp contour for 2% gradient
- fluorescent

A very high reading exactness and speed was one of the most important criteria for our x-tools Screeding Level. We succeeded in developing a bubble, with which we meet all these demands.

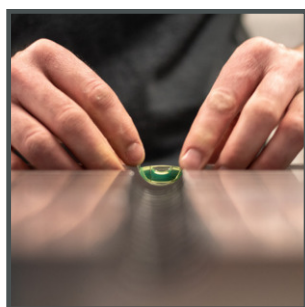

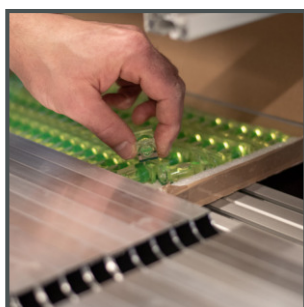

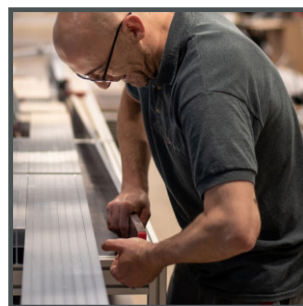

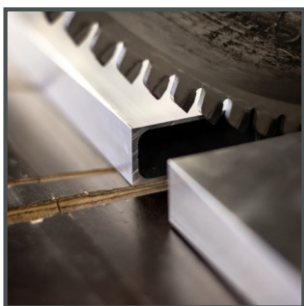

Two steel rings allow the user to look exactly at the bubble.

The ends of bubble reflect the green color of the edges, due to this, reading errors can be avoided.

long-life profile:

Due to the newly developed shape of the profile, the lifetime is extended by 2.5 times, without increasing the weight of the Screeding Level.

The end caps have an equal distance to the edge, so there is no additional material left when pulling off the screed.

Styrofoam cutters

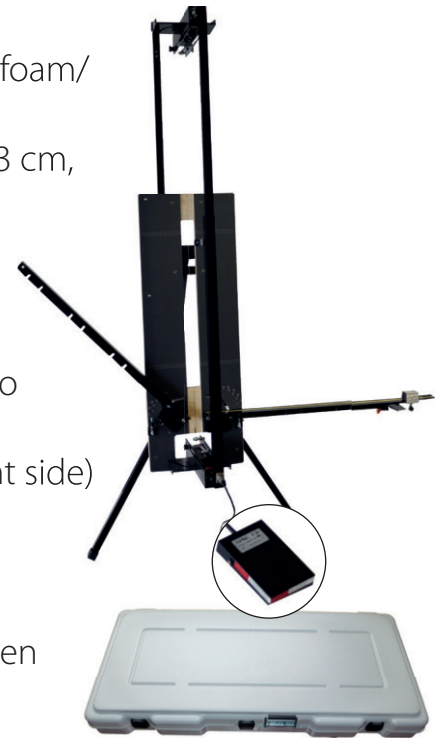

Styrofoam cutter POWERCUT VARIO XXL

For the professional cutting of insulation boards made of Styrofoam/
Polystyrene,
extendable handle, cutting length 81-137 cm, cutting depth 33 cm,
Transformer 42 V / 240 W, weight 14,5 kg,
with slope cutting device,
highly suitable for 100x100cm insulation boards

The wire is fastened by means of a clamping roller, to be able to
adjust the length continuously and flexible.
Thanks to the long support ruler (81cm left side and 91cm right side)
and the depth stop, an exact cutting is guaranteed.

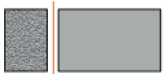

An electronic transformer ensures a constant power supply, even
when working with different wire lengths.

The best window is not efficient without a tight connection!

To ensure a faultless function of the profile connectors on window and door frames, the connection must be done correctly. Windows- and doorframes have to be fixed in accordance with the latest state of the art, inadmissible movements must be excluded. It has to be guaranteed by the ETICS-processor that the connection of the window-, door and frame-constructions is protected against driving rain. The plasterer also has to establish a connection according to the latest state of the art (inside tighter than outside)

Please note the processing guidelines of the quality group ETICS or ÖAP!
If you have any questions, we are always at your disposal.

Processing in overview:

1. Bond test (testing of the bearing capacity)
2. Measuring
3. Cut the length
4. Clean the underground
5. Glue the reveal bead
6. Press the reveal bead into place
7. Watch out for the overlap of 10 cm (mesh)
8. Affix the protective foil for the window

Checking the underground:

1. Clean the surface (degrease with citrus cleaner)
2. Glue and press a profile piece with at least 10 cm length
3. After 10 minutes waiting period, remove the profile carefully
4. If the adhesive contact surface is at least 80% and the break is in the foam strip, the Bond test was successful.
5. If the Bond test was not successful, treat the surface with a primer and start a new test.

Recommendations based on ÖAP standards:

General Terms and Conditions of Sale

General Terms and Conditions of Sale of the PET Austria GmbH

Deliveries are carried out by us only based on the following terms and conditions, which shall be deemed to have been accepted for the present transaction as well as for all further, including earlier, transactions when the order is placed. These Terms and Conditions are valid in so far as they are not changed by deviating written agreements. These General Terms and Conditions of Trade and Delivery shall also apply if the contracting partner communicates its own deviating Terms and Conditions, which we do not expressly object.

1. Prices

Unless otherwise agreed, the prices quoted are on the spot, net from our branches, excluding packaging and loading, packaging will be charged for at cost and will not be taken back. Price changes caused by circumstances over which the contractor has no influence, such as a price increase or price reduction by upstream suppliers, changes of law, official decrees, changes of collective agreement wages as well as price changes due to circumstances imposed by third parties occurring between the conclusion of the contract and delivery or invoicing, will be passed on to the contracting partner if there are more than two months between placing the order and delivery. This provision applies accordingly to fluctuations in currency exchange rates, increase and reduction in material costs based on recommendations of the Joint committee or due to changes (increase or decrease) in world market prices for raw materials, which have an impact on the materials used.

2. Delivery Time

- 2.1. Delivery dates stated by us are estimated delivery dates and non-binding. We can therefore not be held liable in any way for damages caused and loss of profit due to exceeding the delivery time. We are entitled to make partial and pre-deliveries. The transfer of risk and coincidence coincides with the handing over to the customer, the carrier or the forwarding agent, even if we have commissioned them with the delivery.
- 2.2. Goods ordered on "call-off" must be accepted within two months from the date of the order. After expiry of this period – or any shorter or longer period agreed in individual cases – we shall have the right, at our option, to deliver the goods or to withdraw from the contract and in any case to claim compensation for damage suffered and lost profit.
- 2.3. If the contracting partner is a consumer in terms of the KSchG (Austrian consumer protection act), paragraph 1 does not apply, but the contracting partner is entitled to withdraw from the contract if the delivery period exceeds 14 days. We are only liable for damages resulting from a possible delay in the event of gross negligence or intent, so that compensation for damages due to slight negligence is excluded.

3. Warranty

- 3.1. The warranty period for contracting partners who are entrepreneurs in terms of the UGB (Austrian commercial code) and other companies is six months and begins at the time of the transfer of risk. Entrepreneurs are obliged to claim defects immediately by registered mail, otherwise their warranty and damage claims are forfeited. We are entitled to choose the warranty remedy (replacement, redhibition, improvement or price reduction). The occurrence of defects does not entitle to retain the purchase price or a part thereof unless the contracting partners are consumers in terms of the KSchG (Austrian consumer protection act).
- 3.2. The warranty period shall not be extended by a remedy of defects. The Seller shall never be liable for those goods or parts of goods which the Seller has obtained from sub-suppliers to a greater extent than the Seller itself is entitled to warranty claims against the sub-suppliers.
- 3.3. The warranty expires
 - 3.3.1. if changes or modifications are made to the goods delivered by us by parties other than ourselves without our written consent,
 - 3.3.2. if the agreed terms of payment are not met (deferment of payment does not change the loss of the warranty claim),
 - 3.3.3. if the customer does not follow the regulations concerning the treatment of the object of purchase (operating instructions) and in particular does not have the required inspection carried out properly or
 - 3.3.4. if the customer does not examine the ordered goods within 2 working days and does not inform us of any defects in writing (also by email or fax) within the same period. If no notification of defects is made within this period, all services to entrepreneurs shall be deemed checked, approved and handed over free of defects.
- 3.4. We are under no circumstances obliged to compensate for loss of profit and we are only obliged to pay other compensation if the damage was caused by us intentionally or through gross negligence.
- 3.5. The defective goods must be left in the same condition so they can be inspected by a representative appointed by us.
- 3.6. The shifting of the burden of proof in accordance with § 924 ABGB at our expense is excluded if the customer is an entrepreneur.
- 3.7. The warranty is excluded for used machines.

4. Payment

Payment of the purchase price shall be made as agreed or as stated on our invoice. Should payment dates be exceeded, default interest in accordance with § 1333 para. 2 ABGB (Austrian Civil Code) shall be deemed to have been agreed and we shall be entitled to postpone fulfilment of our own obligations until we receive the payments in arrears. In case of customer default, we are entitled to take back the goods to which we retain title until payment has been made in full, without this being equated to a withdrawal from the contract. We are entitled to step back from accepting the order or request advance payment of the entire fee if, after placing the order, circumstances relating to the economic conditions of the customer become known through which our claim no longer appears to be sufficiently secured.

5. Set-off

Offsetting against our claims is not possible. If our business partner is a consumer in terms of the KSchG (Austrian Consumer Protection Act), offsetting against our claims is only permitted if the counterclaim is legally connected to the consumer's obligation and has been established by court or acknowledged by us in writing.

6. Retention of title

- 6.1. The goods shall remain our property until the purchase price, including any interest and collection costs, has been paid in full; in the case of payment by bill of exchange, the goods shall remain our property until the encashment of the bill of exchange. Retention of title shall also apply if the goods are not delivered directly by us but by a third party on our behalf. During this period the customer is therefore not entitled to transfer ownership of the goods to another third party, pledge them, offer them as security or otherwise transfer or process them. The customer is therefore obligated to notify us immediately by registered letter of any damage to the goods purchased, any attachment of these goods or any transfer of these goods and to do everything he is obliged to do as a diligent businessman or custodian so that we suffer no damage to our property.
- 6.2. If the customer sells or otherwise passes on goods subject to retention of title in the ordinary course of business, he hereby assigns to us by way of security all claims and accessory claims against third parties arising from such transactions. Upon request, the customer must inform us of his debtor and all information which we require to assert our claims and shall notify his debtor of the irrevocable assignment of claims. Our customer is authorised and obliged to collect the claims resulting from the resale for us as long as we do not make use of our right of direct collection.

7. Withdrawal from the contract

If there is no legal reason for withdrawal the revocation of the contract requires our written consent. In this case (if a contract is dissolved with our consent), we are entitled to demand 15% of the gross purchase price as contractual penalty, which is not subject to judicial mitigation. Any further claims remain unaffected and in place. We are entitled to step back from accepting the order if, after placing the order and prior to delivery, circumstances relating to the economic conditions of the customer become known through which our claim no longer appears to be sufficiently secured and recoverable.

8. Choice of law

Austrian law shall apply under the exclusion of UN sales law. If our contractual partner is a foreign customer and if UN sales law would apply, it is mutually agreed that this is expressly excluded.

9. Place of jurisdiction

Pursuant to § 104 JN (Austrian Jurisdiction Act) it is agreed that the place of jurisdiction shall be the relevant competent court in Wels. Place of performance shall be our registered office.

10. Data protection

The customer consents that his personal and business data is electronically saved and processed by us and he agrees to receive information about new products and services by electronic mail and telecopies.
