

can be extended as required - can be mounted without tools

Due to the screwability of the tube, the liquid screed bar can be extended as needed in 40 cm steps. From 80 cm to 400 cm. The disassembled liquid screed bar has a transport dimension of max 123 cm - all individual parts can be practically transported in a transport case. The transport case is optionally available from us.

The handles are available in 2 variants (45° or 90°) depending on the user's preference. The handle stands are fastened by means of a quick-release fastener.

The clip-in crossbar can be adjusted in height and serves as a holder for the supplied waste container.
